

1

## Listen and Connect

Every year, each faith community hosts a series of listening sessions. Themes emerge from the stories shared and members gather to democratically select priorities.

2

## Community-Led, Grassroots Research

Research committees interview subject experts and comb through relevant reports. Solutions emerge by looking at best practices in other cities, new proposals from experts, and common sense. Findings are approved by a local board.

3

## Direct Action

Based on the example found in Nehemiah 5, our annual Nehemiah Action demonstrates broad public support for proven solutions. From this platform, we seek and obtain commitments and support from local officials.

4

## Monitor for Impact

As needed, the organization monitors progress on the issue to ensure desired impact. System-wide changes often require a series of cycles before we can responsibly shift our focus to new priorities.
